The Peer Support Services Technical Assistance Center (PeerTAC) is excited to offer a Virtual Summit for Supervisors of Peer Support Services. Join us to learn more about organizational development, tools, and strategies for the successful supervision of Peer Support Specialists/Advocates across the lifespan.

This Summit is intended for program managers, supervisors, and peer team leaders in behavioral health programs from across the state. Join us to gain wisdom from accomplished leaders in the peer support supervisor community, practicing supervision competencies grounded in mutual peer support values, and having frank supervisor-to-supervisor discussions focused on effective supervision of the peer support workforce.

Are you a CEO, Executive Leader, or Business Leader?

Day 1 of the Summit offers a Leadership Forum designed specifically for you. Our morning keynote presenter is a nationally recognized CEO and consultant in the inclusion of peer support services in programs. Following the keynote, an interactive forum focuses on ways in which peer support offers advantages and opportunities for your business. It is a discussion you won't want to miss.
